## Education

---

- Master of Philosophy in Education**, *The University of Hong Kong* 09/2025 – 06/2027  
Thesis: "Developing an AI-Empowered Multimodal Question Generation Platform to Foster CLIL Teacher Assessment Literacy"  
Supervised by Prof. Lo Yuen Yi.  
Supervisory committee: Prof. Jionghao Lin, Prof. Daniel K. T. Fung
- Bachelor of Arts in Linguistics**, *The University of Hong Kong* 09/2021 – 06/2025

## Research Experience

---

- MPhil Thesis Research**, *Faculty of Education, The University of Hong Kong* 2025 – Present
- Designing and developing an AI-empowered multimodal platform for generating CLIL assessment items, integrating multilingual LLM capabilities to support formative assessment in teacher education
  - Building end-to-end system architecture using Next.js, deployed on Railway, with LLM API integration and multimodal input processing
  - Piloting the platform with 7 in-service teachers, grounded in a multilingual and multimodal CLIL assessment framework
- Research Collaborator**, 2026 – Present  
*Prof. Shiyan Jiang's Research Group, University of Pennsylvania*
- Conducted pre/post analysis of 399 secondary students' perceptions of AI relevance across seven career fields following an AI literacy curriculum
  - Identified a calibration pattern where perceived AI-career connections decrease post-instruction while qualitative reasoning becomes more differentiated
  - Co-first-authored paper submitted to ACM CHI 2027
- Research Engineer**, *KindKernel Ltd. (Futurlogue)* 06/2025 – 03/2026  
Hong Kong
- Developed an end-to-end educational assessment platform integrating multilingual ASR/TTS models and LLMs across three languages
  - Engineered backend systems and optimised GPU-based inference pipelines for real-time speech processing
  - Designed automated assessment frameworks grounded in educational research, implementing speech-to-text conversion pipelines for multi-stage spoken-language evaluation
- Research Assistant**, *Academic Unit of Language and Literacy Education, Faculty of Education, The University of Hong Kong* 02/2024 – 12/2024
- Assisted Prof. Lo Yuen Yi on the project "Multilingual and Multimodal Assessment in CLIL Programs," analysing 956 public examination questions across Biology and Geography from the HKDSE (2018–2023)
  - Coded assessment items for cognitive demands, linguistic demands, and multimodal elements using an adapted CLIL assessment framework
  - Conducted statistical analysis using Python; interpreted results for publication and conference presentation

Publications

**How is AI Relevant to My Future Career? Students' Perceptions of AI Capabilities, Limitations, Ethics, and Human–AI Collaboration Across Career Fields**, Submitted to *ACM Conference on Human Factors in Computing Systems (CHI 2027)*, under review. 2027  
**Chuang, C.K.\***, Yang, K.B.\*, Rosé, C., & Jiang, S.  
\*Co-first authors.

**Same Answer, Different Class: Peer-Context Contamination in LLM-Based Grading**, Submitted to *AAAI-27 Special Track on AI for Social Impact*, under review. 2027  
**Chuang, C.K.** & Lin, Q.  
First author.

**From Feedback to Regulation: Comparing Generative AI and Human Feedback in Supporting Self-Regulated Learning**, *Proceedings of the 27th International Conference on Artificial Intelligence in Education (AIED 2026)* 2026  
**Chuang, C.K.**, Dai, W., Li, T., Lin, J., Li, X., Fan, Y., & Gašević, D.  
First author.
